

# Big Horn Outdoor Adventure Show Booth Guidelines

## BOOTH SPECIFICATIONS

Booths will have a backdrop of 8 feet in height and side walls no more than 3 feet high measuring one half the distance back from the front of the booth. From that point to the rear of the booth, the side walls may be 8 feet in height.

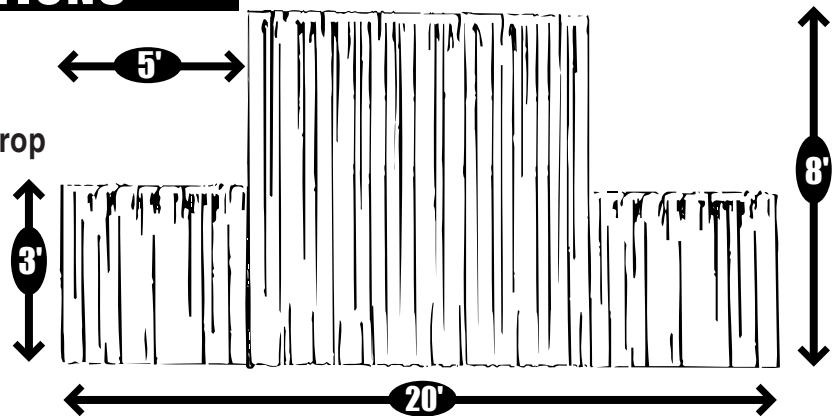

A custom booth may be used or, if necessary, LCD Exposition Services will be available to rent a pipe and drape booth, along with other booth accessories, as needed.

A nice appearing booth is required on all areas that will be visible to the public. Any unfinished, exposed portion of the exhibit must be draped.

Any exemptions from the above must be approved by prior authorization by Big Horn Show Staff.

## END CAP BOOTH SPECIFICATIONS

End cap booths will have a backdrop of no more than 8 feet in height. The outer 5 feet on each end of the backdrop will be no more than 3 feet high, providing the equivalent of a sidewall to the booths behind them. Any exemptions must be approved by prior authorization of Big Horn Show staff.

**All tables in your booth(s) must be "draped"**

If you have any complications with the booth dimensions contact the INWC @ 509-487-8552
